

RTM-02

EFFECTIVE NOTIFICATION

RTM-02 Recall Dongle

The RTM-02 is a "Recall Dongle" designed to allow easy integration with a wide variety of juvenile products.

The RTM-02 combines a ReadyTrace RT-0301-LP Low Power Product Notice Receiver (PNR) with an antenna, a CR2032 Coin Battery, a motion detector and a light emitting diode to deliver a reliable, easy to use recall mechanism for high-chairs, strollers, play-pens, child safety restraints and all sorts of other juvenile products.

EASY INTEGRATION

LOW-COST, SELF-CONTAINED MODULE
